	X YES ☐ NO	7 July 1965
		LETTER NO. IAD/OSS - 7/65

TO : Assistant for Plans & Development, NPIC
ATTN: Chief, Development Branch, P&DS

FROM: Chief, Imagery Analysis Division, CIA
(Formerly Photographic Intelligence Division)

SUBJ: Mensuration Study

REF: News Letter Number Five Prepared [redacted]

As per discussions between yourself and [redacted] with respect to the proposed continuation of Photo Interpreter Response Study, it is understood that Part II will be concerned with determining the accuracy of target mensuration as a function of ground resolution. It is requested that either as a part of this study or following this formal effort, IAD P.I.'s be utilized in running mensuration tests on the [redacted] Chip Comparator. We feel, as you do, that such a program will prove valuable in the future as the accuracy of mensuration equipment as well as human capabilities become increasingly important in detailed reporting.
